GitHub: <https://github.com/Vishal-9648169281>

Professional Summary

Computer Science undergraduate with experience in Full Stack Development, Software Engineering, Backend Development, Mobile Application Development, and AI-powered applications. Skilled in building scalable web, desktop, and mobile applications using Python, Django, React.js, Flutter, SQL Server, and REST APIs. Experienced in AI integration, Agentic AI workflows, and cloud-ready architectures. Solved 350+ Data Structures and Algorithms problems and passionate about building intelligent software systems.

Experience

Software Developer — Chandigarh Team Computers (CTC), Chandigarh

Jun 2026 – Present

- Developing enterprise software solutions and custom applications for clients across multiple industries.
- Working on Full Stack Development using Python, Django, React.js, JavaScript, SQL Server, and REST APIs.
- Designing and modernizing desktop, web, Android, and iOS applications.
- Building scalable software architectures and cloud-ready systems.
- Working on AI-powered software solutions, LLM applications, Agentic AI integration, and intelligent automation.
- Participating in database design, API development, debugging, deployment, and maintenance activities.
- Using Git and GitHub for version control and collaborative development.

Education

Pranveer Singh Institute of Technology, Kanpur

2022 – 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 7.03

Technical Skills

Programming Languages: Python, C++, JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React.js, TypeScript, Tailwind CSS, Bootstrap

Backend: Django, Django REST Framework, FastAPI, Node.js, Express.js

Mobile Development: Flutter, Android Development, Cross-Platform Development (Android & iOS)

Databases: SQL Server, MySQL, SQLite, MongoDB

Artificial Intelligence: Machine Learning, NLP, Transformer Architecture, LLM Applications, Agentic AI, Prompt Engineering, RAG Concepts, LangChain

Tools and DevOps: Git, GitHub, Docker, Linux, REST APIs

Core Computer Science: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Projects

SmartBuy360 – AI-Powered E-Commerce Price Comparison Platform

- Designed scalable architecture for price comparison and recommendation systems.
- Built backend workflows using Node.js, Express.js, and MongoDB.
- Planned AI-powered image search and barcode-based product discovery.

AI-Based IT Support Ticket Auto-Triage System

- Developed intelligent ticket routing using transformer-based NLP models.
- Automated issue classification and response generation.
- Integrated ML inference with Django backend workflows.

Achievements

- Solved 350+ Data Structures and Algorithms problems on LeetCode.
- Built Full Stack and AI-powered applications with scalable architectures.
- Strong understanding of Software Engineering principles and API design.

Certifications

Data Structures and Algorithms — Full Stack Web Development — Machine Learning Fundamentals

Soft Skills

Problem Solving — Analytical Thinking — Communication — Team Collaboration
